

# BREDE PARISH COUNCIL

## Risk Management Scheme adopted on 29<sup>th</sup> March 2022

## Reviewed and re-adopted on 28<sup>th</sup> May 2024

The Joint Panel on Accountability and Governance (JPAG) Practitioners Guide advises that Risk Management is an ongoing activity that comprises four elements: identifying risks, assessing risks, addressing risks and reviewing and reporting. Councils must ensure that they have adequate risk management in place for financial management and the public services they deliver. The council and its individual members are responsible for risk management. JPAG Sections 5.97-5.99 are summarised in the Annex.

This document has been produced to enable Brede Parish Council to assess the risks that it faces and satisfy itself that it has taken adequate steps to minimise them.

### Risk Prioritisation

The following table, as recommended by the JPAG 2020 Practitioners guide has been used for this Risk Management Scheme

<b>Likelihood</b>	Highly Likely (3)	Moderate (3)	Severe (6)	Severe (9)
	Possible (2)	Low (2)	Moderate (4)	Severe (6)
	Unlikely (1)	Low (1)	Low (2)	Moderate (3)
		Negligible (1)	Moderate (2)	Severe (3)
<b>I m p a c t</b>				

**Key:** Low = Risks can be considered in the annual business cycle; Moderate = Risks should be considered at the next scheduled meeting of the Council. Severe = Risks should be considered immediately by the Clerk and Chair, if necessary calling an extra-ordinary meeting of the Council. All actions should be reported at the next scheduled Council meeting.

## **ANNEX**

### **From the JPAG Section 5.97 -5.99**

Addressing risks:

Risk is unavoidable, and every organisation needs to take action to manage risk in a way which it can justify to a level which is tolerable. The response to risk, which is initiated within the organisation, is called 'internal control' and may involve one or more of the following standard responses:

- Tolerate the risk - for risks where the downside is containable with appropriate contingency plans; for some where the possible controls cannot be justified (e.g. because they would be disproportionate); and for unavoidable risks, e.g. terrorism.
- Treat the risk - a common response which can mean imposing controls so that the organisation can continue to operate; or setting up prevention techniques.
- Transfer the risk – buying in a service from a specialist external body or taking out insurance. Some risks cannot be transferred, especially reputational risk.
- Terminate the activity giving rise to the risk - it may be best to stop (or not to start) activities which involve intolerable risks or those where no response can bring the risk to a tolerable level.

Areas where there may be scope to use insurance to help manage risk include the following:

- The protection of physical assets owned by the authority – buildings, furniture, equipment, etc. (loss or damage).
- The risk of damage to third party property or individuals as a consequence of the authority providing services or amenities to the public (public liability).
- The risk of consequential loss of income or the need to provide essential services following critical damage, loss or non-performance by a third party (consequential loss).
- Loss of cash through theft or dishonesty (fidelity guarantee).
- Legal liability as a consequence of asset ownership (public liability).

The limited nature of internal resources in most authorities means that those wishing to provide services often buy them in from specialist external bodies. Areas where there may be scope to work with others to help manage risk include the following:

- Security for vulnerable buildings, amenities or equipment.
- Maintenance for vulnerable buildings, amenities or equipment.
- The provision of services being carried out under agency/partnership agreements with principal authorities.
- Banking arrangements, including borrowing or lending.
- Ad hoc provision of amenities/ facilities for events to local community groups.
- Markets management.
- Vehicle or equipment lease or hire.
- Trading units (leisure centres, playing fields, burial grounds, etc.).
- Professional services (planning, architects, accountancy, design, etc.)
