# Agenda Item 4

"Further to our conversation this week, here is a vision-diagram of the ideas we put forward for further development of the web pages:

- of course, I realise we have not included cycling and walking and I think there should be other pages; for example we could have links to roadworks affecting cyclists and footway closures affecting pedestrians...? However the main modes would be covered by developing along the lines suggested above.

I see this aspect of the web offer being a way of showing users that the website can become a "one-stop shop" for info and reporting links and thereby that HARTAG engagement with travel and transport issues is useful to the public as well as providing a "shop-window" for its mission.

If it would help expedite web development, I am happy to come to Bexhill for an interactive session with the team."
