Vehicle Activated Sign (VAS) Report

The VAS calibration data for April was determined this time last year.

Black Cat Traffic Monitoring Device

There were two Black Cat monitoring sessions carried out this month, one at Old Winders the other at Brickfields. The results from these sessions were compared with the previous recording sessions taken last year and are summarised in the tables below and graphically on the next page.

Old Winders

Recording dates / Day	10/04/22 to 16/04/22		05/04/23 to 11/04/23		Remarks

Saturday	2620	2934	1427	2401	Easter Saturday

Total volume	18754	20309	9699	15043	
Variance %			-48%	-26%	
85 th percentile			38.3 mph	39.5 mph	40 mph zone

Note: 85th percentile is less than the speed limit.

The variance figure for Beckley is suspect. I have always had trouble recording at this site, I believe that I now know why; the width of the road here is narrower than along Main Street and this had not been accounted for.

Brickfields
