

## Village Traffic and Roads Report

### Vehicle Activated Sign (VAS) Report

The VAS calibration data for July was determined by a Black Cat calibration generated last year.

The calibration value for speeders at 36mph and above is 5.28 and for excessive speeders 45mph and above is 6.05.

The number of speeding vehicles recorded was less than that for June but comparable with those for April and May. The number of excessive speeding vehicles is the highest since September, the start of this type of recording.

### Black Cat Traffic Monitoring Device

A Black Cat monitoring session carried out this month at Tanhouse Lane. The total traffic volume in each direction shows virtually no change with that recorded in September 2022.

### Speed Watch

There were four speed watch sessions carried out in July and are summarised below.

Date	Time	Recordings	Excessive speed	Letters sent	Remarks
17/07/23	15:00-16:00	11	0	10	PCSO present
24/07/23	10:00-11:00	16	0	12	
25/07/23	06:00-07:00	20	1	16	
28/05/23	06:00-07:00	22	0	18	
Totals	4 hours	69	1	56	

There are currently no sessions planned for August.
