

Village Traffic and Roads Report

Vehicle Activated Sign (VAS) Report

The VAS calibration data for December was determined by a Black Cat calibration generated last year. The calibration value for speeders at 36mph and above is 3.79 and for excessive speeders 45mph and above is 5.85.

Recordings were lost due to lack of battery charge during the following periods: 12/12/23 02:25:11 until 15/12/23 12:45:22, 18/12/23 16:47:49 until 26/12/23 10:41:53, 30/12/23 17:24:55 until 03/01/23 11:48:43. This resulted in 15 whole days without any recordings and 5 days with only partial recordings.

It would be reasonable to double the values recorded to get a better estimate of the true record. This would give 7310 vehicles recorded at 36mph and above with 50 travelling at 45mph and above.

Black Cat Traffic Monitoring Device

There were two Black Cat monitoring surveys carried out in the period, the first at the Maltings and the other at the bottom of School Lane. The results of the survey at the Maltings gave a surprising result, discussed in a separate report. The survey at School Lane was still being taken at the time of writing this report.

Speed Watch

There was one speed watch sessions planned and held in December.

Date	Time	Location	Recordings	Excessive speed	Letters sent	Remarks
18/12/23	11:00 – 12:00	Old Post Office	4	0	4	
Totals	1 hours		4	0	4
