

Village Traffic and Roads Report

Vehicle Activated Sign (VAS) Report

The Black Cat was used to provide an update to the calibration values for the month of May. The new values are: 5.17 for speeding vehicles and 6.77 for excessive speed. The calibrated total number of speeding vehicles recorded was 6645 of which 380 vehicles were speeding excessively.

At the April council meeting there was a discussion as to why there is now a sudden drop off in the number of speeding vehicles. It was suggested that this is due a reduction in traffic volume. The two Tables below would suggest this is not the case as the variation of speeding vehicles is greater than that for the total volume of vehicles.

Black Cat Traffic Monitoring Device

There were two Black Cat monitoring sessions carried out this month one to provide calibration data for this month's VAS recordings. As May is a neutral month the 85 percentiles of speed can also be determined at Two Hoots. Towards Beckley it was, 33.14mph, towards Rye it was 36.84mph. The second at Brickfields and the 85 percentiles towards Beckley was 33.76mph and towards Rye was 33.86.

The recording at Two Hoots was conducted over the May Day bank holiday and that at Brickfields over the second May bank holiday.

Speed Watch

There were two speed watch sessions carried out in the period and the results are summarised below.
