

Village Traffic and Roads Report

Vehicle Activated Sign (VAS) Report

Due to the low light levels during February the battery became exhausted between 18:57 on 08/02/25 to 11:13 on 12/02/25, 02:44 on 13/02/25 to 10:03 on 14/02/25. Recordings were lost for approximately 4 days. This is the first time recordings have been lost during a February.

The VAS recorded 20739 speeding vehicles of which 1311 were speeding excessively. VAS calibration values that were determined for February last year were used this year; the values being 5.25 for speeding vehicles and 6.65 for excessive speeding, resulting in 3950 speeding of which 197 were excessive.

Black Cat Traffic Monitoring Device

There were no Black Cat Monitoring sessions during the period.

Speed Watch

There were no speed watch sessions this month due to lack of operator availability. It is hoped that there will be sessions during March.
