

Village Traffic and Roads Report

Vehicle Activated Sign (VAS) Report

The VAS recorded 27989 speeding vehicles in August of which 1768 were speeding excessively. VAS calibration values that were determined for August 2022 were used this year; the values being 5.26 for speeding vehicles and 6.23 for excessive speeding, resulting in 5321 speeding of which 283 were excessive.

The VAS calibration values for August 2022 were used in preference to those measured in 2024 because the 2024 values were very high compared to all other calibration values calculated over the two periods for all months.

Black Cat Traffic Monitoring Device

There was one Black Cat monitoring sessions during August at the proposed junction for the Kitewood development with the A268. Resulting in 19022 vehicles heading towards Rye of which 1641 were speeding with 88 excessive speeders. Towards Beckley 20638 vehicles were recorded of which 3087 were speeding with 206 excessive speeders.

In June there were 18257 vehicles heading towards Rye of which 1553 were speeding with 78 excessive speeders. Towards Beckley there were 19779 vehicles recorded of which 2853 were speeding with 178 excessive speeders.

The 85 percentiles measured in June was 34.7mph towards Rye and 35.2 mph towards Beckley.

August is not a neutral month for percentiles but was measured anyway; giving 34.62mph towards Rye and 36.26mph towards Beckley.

Speed Watch

There were no speed watch sessions this month.
