

Village Traffic and Roads Report

Vehicle Activated Sign (VAS) Report

The VAS recorded 33689 speeding vehicles in September of which 2176 were speeding excessively. VAS calibration values that were determined for September 2022 were used this year; the values being 5.63 for speeding vehicles and 6.45 for excessive speeding, resulting in 5983 speeding of which 337 were excessive.

The VAS calibration values for September 2022 were used in preference to those measured in 2024 because the 2024 values were very high compared to all other calibration values calculated over the two periods for all months.

Black Cat Traffic Monitoring Device

There was no Black Cat monitoring sessions during the period.

Speed Watch

There were two speed watch sessions this month.

Date	Time	Recordings	Letters	Excessive speed	Remarks
01/09/25	10:00 – 11:00	14	14	0	
04/09/25	07:30 – 09:00	31	28	1	
Totals	Sessions 2	45	42	1	

The body warn camera has been delivered.
