

Village Traffic and Roads Report

Vehicle Activated Sign (VAS) Report

All available for February was downloaded; however, due to low light levels there were several periods' data was not recorded due to the battery being exhausted. The periods of time that data was lost is summarised in the table below.

In February 390.75 hours (16.3 days) of data were lost due to battery exhaustion. The VAS recorded 10001 speeding vehicles of which 401 were speeding excessively. VAS calibration values that were determined this month the values being 4.37 for speeding vehicles and 3.01 for excessive speeding, resulting in 2288 speeding of which 133 were excessive.

Black Cat Traffic Monitoring Device

There was a Black Cat monitoring session carried out between 21/02/26 and 27/102/26 at Two Hoots resulting in 16929 vehicles recorded travelling towards Beckly, of which 1070 were speeding (36mph and above) including 73 vehicles speeding excessively (45mph and above).

The number of vehicles recorded heading towards Rye was 17226, of which 2631 were speeding including 139 speeding excessively.

Calibration values for the VAS were determined; however, there was a loss of VAS recordings due to battery exhaustion, see table above for details, during the period. The best estimate of calibration is: 4.37 for speeding and 3.01 for excessive speeding.

Time periods when recording data lost due to battery exhaustion
